

Programme IFPC 2025

Wednesday 17th of September			
08:15		Registration opens	
		Trends and market Session	
09:15		Intro Session Chair	
09:30	Key Note	Huhtamäki	Key Note: Moulded products
		360 Foodservices	EU Regulation colliding with market growth: Points of discomfort for moulded fibre
		AFRY	Market analysis for moulded packaging
		Danone	Brand owner requirements for moulded pulp in the dairy category
11:10	Coffee Break		
		Process Session	
12:00		Intro Session Chair	
	Session note	Optima-Packaging	New dry moulding packaging solutions and insights
		Yangi	Beyond the Mold: Rethinking mass-market packaging through dry molded fibers
		Kiefel	Wet Molded Fiber and Dry Molded Fiber, and the benefits from both technologies
13:00	Lunch		
14:30		Session Chair	
		To be announced	Production of moulded products: Process needs and opportunities for suppliers
		Kemira	Laboratory scale spray coater – performance in molded fiber barrier applications
		Archipelago Technology	Achieving a pinhole-free coating with the Powerdrop end-to-end coating process
15:20	Coffee break		
16:00		Session Chair	
		To be announced	Technical breakthroughs and solutions to support our sustainable packaging strategy
		Fiber Thermoforming Technologies	Cost efficient thermoforming
		Dow	Meeting PPWR requirements - PCR containing barrier dispersions for fibre-based packaging coatings
17:00	End of day 1		
18:15	Social networking and dinner		
19:30	Dinner		

Thursday 18th of September			
08:15		Doors open	
		New Innovations Session	
09:00		Intro Session Chair	
09:20	Session note	Neopack	The PaperX Case: Tubes redesigned for the Paper Recycling Stream
		To be announced	
		VTT	Novel foldable lightweight design structures
		RISE PFI	Injection Molding of Wood Pulp
10:25	Coffee Break		
11:15		Session chair	
		Kemira	The Effect of Different Oils on the Oil resistance of Molded Fiber
		Tecnalia	REDYSIGN – Fresh meat packaging trays with improved water resistance through enzymatically-assisted functionalization of mechanical pulp fibers and fines
		InnoFibre	From textile waste to moulded fibre packaging.
		Fibenol	WOODCELL - MCC in wet moulding applications
12:20	Lunch		
		Products Session	
13:40		Intro Session Chair	
13:55	Session note	EMPPA	Moulded Pulp for a Circular Economy
		Graphic Packaging International	Molded fiber: challenges and opportunities for a fiber-based packaging converter
		Pulpac	New dry moulding solution
		Rottneros Packaging	Terrific – an EU collaboration project for sustainable packaging solutions
		FiberLean	MFC produced using FiberLean Wet Stirred Media Mills: Applications in moulded and formed paper products
15:25	Outro	RISE	
15:30	Coffee break		
17:00	End of conference
