

CLIMATE DECLARATION FOR RISE IVF AB RESEARCH SERVICES

Functional unit: 1 hour of research service

The climate declaration shows the emissions of greenhouse gases, expressed as CO₂-equivalents. It is based on verified results from a lifecycle assessment (LCA) performed as basis for an EPD®, in accordance with ISO 14025.

Information about the product

RISE IVF AB provides research services within the sectors of materials, process, product, and production technology. The objective is to create commercial advantages and strengthen the competitiveness and innovation capacity of our members and customers. The research services include research and development, testing, pilot production, training, standardization and consulting.

The implementation of the results of our research has, in general, a larger environmental impact, often positive, than the research itself. Even so, this phase is not included in the declaration as it cannot be calculated with any precision. RISE IVF AB evaluates the sustainability of all research projects in order to maximize impacts of positive sustainability aspects and minimize impacts of negative sustainability aspects in the projects.

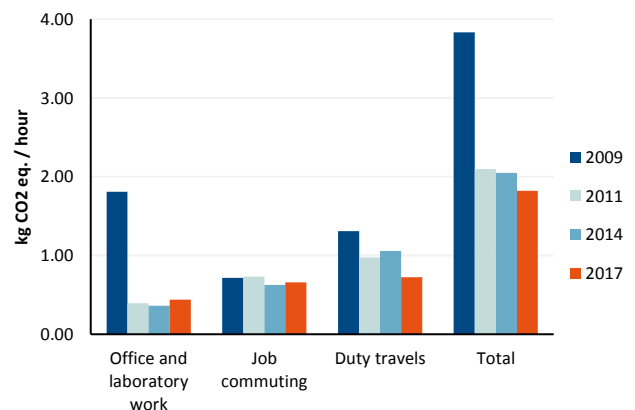

Information about the company

RISE IVF AB is part of RISE AB, RISE Research Institutes of Sweden. This climate declaration concerns only RISE IVF AB and its staff of approximately 170 people based in Mölndal (Headquarters) and regional offices in Stockholm, Olofström, Jönköping and Linköping.

Climate declaration

This climate declaration describes the emissions of greenhouse gases, expressed as CO₂ equivalents, for one hour of RISE IVF AB research services

Materials and equipment used in our research as well as energy used in our buildings and for staff travel are included in the calculations. Note that travel data includes production of fuels as well as production and maintenance of vehicles and transport infrastructure such as roads.

Other environmental impacts

For the full EPD, see www.environdec.com.
