- Participation in the activities outlined in the program timeline
- Some technological validation comes at a cash cost (this is optional)

WHAT IT TAKES

- **Make sure** you work with technologies within one of the following sub-themes: Urban farming, greening cities Energy optimization Sustainable building materials Waste management
- **We would also like to invite you** to sign up for our web platform to keep updated on funding and other relevant possibilities and information already now (*this platform is not restricted to selected start-ups*).
- **Participants have to sign a document** stating if they have received more than 200.000 euro in de minimis aid in the past 3 years

PROCES AND PRACTICALITIES

20 entrepreneurs and start-ups are selected in the second round to participate in the development programme (October-December 2020) in September 2020.

You sign up to the Cleantech Impact Accelerator programme through our web-based application form. Remember, the selection panel only sees what you submit so make sure you're to the point!

DEADLINE: 7th of October.

[Sign up HERE!](#)

In the selection process, a panel of business development experts and technological experts will select the most promising participants based on:

The innovation level of the technology

The potential impact of the idea for customers and/ or society

The possibility of the business to succeed and create jobs in the Øresund Region
