Welcome to matchmaking, November 10 in Brazil

Interested in AI, healthcare and smart cities?

Then this is a matchmaking event for you!
Take the opportunity to make new contacts and find partners and funding for your new and exciting project.

Take your business to new heights
Here you get the chance to meet interesting people who can lift your company or organization to new heights in the subjects of health, smart cities, and artificial intelligence. The matchmaking is part of the Sweden Brazil Innovation Week 2022.

Become part of international research and development projects
During the matchmaking, you lay the foundation for new collaborations and get good conditions for taking part in international research and development projects in smart cities and healthcare with AI as an enabler. You come together to be able to form a consortium and apply for funding for joint projects via the financing program Eureka Globalstar.

Apply for travel grants to participate
For those who are interested in participating in matchmaking, there is a travel grant from the Swedish innovation authority Vinnova to apply for, up to SEK 25,000 per organization/company.

Interested and want to know more?
